WHAT ARE TREATMENT COURTS

Treatment Courts are an effective strategy for treating substance abuse and mental illness while reducing recidivism and saving taxpayer dollars. These courts have proven that a combination of supervision, treatment and support can lead people with substance use and/or mental health disorders into lives of stability, wellness and recovery.

Instead of prison time, **Treatment Courts** deliver services for lifelong recovery, keep our roads safe from impaired drivers, give parents tools they need to stay sober and maintain custody of their children, and divert individuals from a life of substance abuse, mental illness and crime. They have been proven to reduce use of jail and prison beds, emergency room admissions, family conflicts associated with domestic violence and child abuse, and foster care placements.

WHAT WE DO

Pennington County DUI, **Drug**, **Veterans** and **Mental Health Court** provide an innovative approach to rehabilitating those substantially impacted by a substance use disorder or mental health disorder who are likely to continue to commit crimes without intervention.

This is a public health approach to justice reform in which treatment providers partner with probation, defense, prosecution, law enforcement and the judge to ensure individuals before the courts receive personalized and evidence-based treatment, ongoing support and recovery services.
